SECTION III- RISK FACTORS

An investment in Equity Shares involves a high degree of risk. prospective investors should carefully consider all the information in this Red Herring Prospectus, particularly the **“Financial Information of the Company”** and the related notes, **“Our Business”** and **“Management’s Discussion and Analysis of Financial Condition and Results of Operations”** beginning on pages 141, 94 and 177 respectively and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Red Herring Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the merits and the risks involved.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some events may not be material individually but may be found material collectively.
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material at present but may be having material impact in future.

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Red Herring Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in **“Risk Factors”** beginning on page 23 and **“Management Discussion and Analysis of Financial Condition and Results of Operations”** beginning on page 177 unless otherwise indicated, has been calculated on the basis of the amount disclosed in the **“Audited Financial Statements, as restated”** prepared in accordance with the Generally Accepted Accounting Principles in India (Indian GAAP).

INTERNAL RISK FACTORS

1. **A significant portion of our revenue is generated from sales of our top five products. The loss of customers who purchase these products, or a significant reduction in the production and sales of, or demand for said products may adversely affect our business, financial condition, results of operations and prospects.**

Majority of the revenue coming from printing inks and paints and coating products. The revenue contribution from our top five product categories has been substantial, accounting for 65.15% in fiscal year 2024, 75.31% in 2023, and 79.94% in 2022 of our total revenue from the sale of goods. However, the composition of these top products is subject to change due to evolving market dynamics, consumer preferences, and our ongoing product innovation efforts. Potential factors such as increased competition, pricing pressures, fluctuating demand, or supply chain disruptions pose risks that could impact future revenue from these key categories. Any adverse developments in the sales performance of our top five products could significantly affect our overall revenue and, consequently, have adverse implications for our business operations, financial performance, and overall market position. To mitigate these risks, we remain committed to diversifying our product portfolio, investing in innovation, closely monitoring market trends, and implementing robust risk management strategies.

Below is the summary of revenue from our top-five products over last three years:

<i>(₹ in lakhs except percentage)</i>

- 2. We are dependent upon third parties for trading and supply of the products we sell, with whom we may not had long term contracts or exclusive supply arrangements. Any delay or failure on the part of such vendors to deliver products, may adversely affect our business, profitability and reputation.**

We obtain some of our products from third parties, with whom we generally do not have long-term contracts or agreements. The orders for the products are placed on requirement basis. In such event, our Company may face challenges in securing a stable and predictable supply of products and our ability of delivering the products may be affected. Any of our supplier's failure to adhere to agreed timelines, whether due to their inability to comply with, or obtain, regulatory approvals, or otherwise, may result in delays and disruptions to our sales, increased costs, delayed payments for our products and damage to our reputation leading to an adverse effect on our results of operations, although, no such instance occurred in the past, by the Company till date.

Therefore, we are subject to risks of shortages or discontinuation in supply, long lead times, cost increases and quality control issues with our suppliers. In the event of any such interruption in supply, we would need to identify and obtain acceptable replacement sources on a timely basis. There is no guarantee that we would be able to obtain such alternative sources of supply on a timely basis, if at all, and an extended interruption in supply, particularly of a high-sales volume product, could result in a significant disruption in our sales and operations, as well as damage to our relationships with customers and our reputation. We believe we have maintained stable relationships with these vendors in the past, we cannot assure you that, we will be able to source adequate quantities of products in a timely manner from our existing vendors in the future or we will be able to find alternative vendors at acceptable prices and quality levels or at all.

- 3. Our business is dependent and will continue to depend on our manufacturing facilities, and we are subject to certain risks in our manufacturing process. Any slowdown or shutdown in our manufacturing operations or strikes, work stoppages or increased wage demands by our employees that could interfere with our operations could have an adverse effect on our business, financial condition and results of operations.**

We conduct our operations through our manufacturing facility situated at Palghar District in Maharashtra. The core of our business relies on efficient management of the manufacturing facility, however our operations face a spectrum of operational risks, some of which are beyond our control, such as the breakdown, failure of equipment or industrial accidents, severe weather conditions and natural disasters. Any significant malfunction or breakdown of our machinery, or, our IT systems may entail significant repair and maintenance costs and cause delays in our operations. If we are unable to repair our assets and systems in a timely manner or at all, our operations may need to be suspended until we procure the appropriate assets to replace them. In addition, we may be required to carry out planned shutdowns of our facilities for maintenance, customer audits and testing, or may shut down certain facilities for capacity expansion and equipment upgrades.

Success of our operations depend on availability of labour and good relationships with our labour force. As of the date of this Red Herring Prospectus, our employees are not members of any organized labour unions. Strikes and lockouts as a result of disputes with our labour force may adversely affect our operations. While we have not had instance of strikes, lockouts or labour disputes in the past, we cannot assure you that we shall not experience any strikes or lockouts on account of labour disputes in the future. Such events could disrupt our operations and may have a material adverse effect on our business, financial condition and results of operations. Further, we may be subject to manufacturing disruptions due to contraventions by us of any of the conditions of our regulatory approvals, which may require our manufacturing facilities to cease, or limit, production until the disputes concerning such approvals are resolved. Although we have not experienced any significant disruptions at our manufacturing facilities in the past, we cannot assure you that there will not be any disruptions in our operations in the future. Our inability to effectively respond to such events and rectify any disruption, in a timely manner and at an acceptable cost, could lead to the slowdown or shutdown of our operations or the under-utilization of our manufacturing facility, which in turn may have an adverse effect on our business, financial condition and results of operations.

The concentration of all of our manufacturing operations in Palghar exposes us to adverse developments related to regulation, as well as political or economic, demographic and other changes in Maharashtra as well as the occurrence of natural and man-made disasters in Maharashtra, which may adversely affect business, financial condition and results of operations. Our manufacturing operations require significant labour and are also reliant on government policies in terms of taxes, duties and incentives made applicable by the state government. As a result, any unfavorable policies of the state government or state or local governments in this region, could adversely affect our business, financial condition and results of operations.

4. We derive a significant part of our revenue from major customers and we do not have long term contracts with these customers. If one or more of such customers choose not to source their requirements from us, our business, financial position and results of operations may be adversely affected.

Our customer base currently comprises a host of international and domestic companies. Our top 10 customers contributed approximately 34.08%, 31.59% and 36.66% of our revenue from operations for year ended on 31st March 2024, 31st March 2023 and 31st March 2022 respectively. We expect that we will continue to be reliant on our major customers in future. Accordingly, any failure to retain these customers and/or negotiate on terms that are commercially viable, with these select customers, could adversely affect our business, financial condition and results of operations. In addition, any defaults or delays in payments by a major customer or the insolvency or financial distress by a major customer may have an adverse effect on business, financial position and results of operations. Many of the purchase orders we receive from our customers specify a price per unit and delivery schedule. However, such orders may be amended or cancelled prior to finalization, and should such an amendment or cancellation take place, it may adversely impact our production schedules and inventories. Cancellation by customers or delay or reduction in their orders or instances where anticipated orders fail to materialize can result in mismatch between our inventories of raw materials and of manufactured products, thereby increasing our costs with regard to maintaining our inventory and reduction of our margins, which may adversely affect our profitability and liquidity. Additionally, our customers have high and stringent standards for product quality and quantity as well as delivery schedules. Any failure to meet our customers' expectations could result in the cancellation of purchase orders. There are also a number of factors, other than our performance that could cause the loss of a customer, which include those customers who may demand price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, or replace their existing products with alternative products, any of which may have an adverse effect on our business, financial condition, results of operations and prospects. We typically do not enter into long-term agreements with any of our customers, and an inability to continue to engage with them would have a material adverse effect on our business, results of operations and financial condition.

5. There are certain discrepancies/errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 1956/2013. Some of our corporate records are not traceable. Any penalty or action taken by any regulatory authorities in future, for non-compliance with provisions of corporate and other law could impact the reputation and financial position of the Company to that extent.

There are a few discrepancies in our corporate records related to e-forms filed with the Registrar of Companies. These discrepancies include clerical errors in the annual returns filed by our Company with the ROC in past years. For instance, the attached list of transfers shows incorrect details in the Annual Return filed with the ROC for FY 2008-09, and the transfer list was not attached in the Annual Return filed for FY 2009-10. However, these errors were rectified in the Annual Returns filed for FY 2010-11.

Further certain of our corporate records in relation to increase in authorized share capital, namely the Form-5 filed with the Registrar of Companies in relation to the increase in authorized share capital from ₹ 1.00 Cr to ₹ 2.50 Cr approved in General Meeting dated February 22, 2006 and Form-32 for change in designation of Aditya Sharma, Narendra Parameswarappa Kothhall, and Purushottam Brijlal Sharma from Director to Whole-time Director are not traceable in the historical records maintained by our Company, or at the MCA Portal maintained by the Ministry of Corporate Affairs. We have obtained certificate for the same from M/s. NKM & Associates, Company Secretary in relation to such untraceable corporate records. Further the share transfer deed in respect to transfer of shares of our Company in financial year 2009-10 are not traceable. Accordingly, we have relied on the other corporate records maintained by the Company such as minutes and statutory registers to ascertain the information for the missing corporate records. While no legal proceedings or regulatory action has been initiated against us in relation to the unavailable filings and statutory lapses as of the date of this Red Herring Prospectus, we cannot assure you that such proceedings or regulatory actions will not be initiated against us in the future in relation to the missing filings and corporate records. We cannot assure you that any such proceedings will not have a material adverse effect on our financial condition or reputation.

Further, our Company has not filed Form CHG-1 for creation of charge on certain vehicle loan taken in the past, which is non-compliance of section 77 of the Companies Act, 2013 read with rules made thereunder and is subject to penalty under section 86 which states that the company shall be liable to a penalty of five lakh rupees and every officer of the company who is in default shall be liable to a penalty of fifty thousand rupees. However, no such loans are outstanding as on date of this Red Herring Prospectus. Further, board of directors of the company has directed CFO to implemented strict monitoring and improved processes to ensure filing of CHG-1 in the future.

Our Company has failed to comply with the provisions of section 135 of the Companies Act, 2013 to spend on CSR expenses for the FY 2020-21, which is in non-compliance of section 135 of the Companies Act, 2013 read with rules made thereunder which is subject to the penalty under section 135(7) of the Companies Act, 2013 which states that the company shall be liable to a penalty of twice the amount required to be transferred by the company to the Fund specified in Schedule VII or the Unspent Corporate Social Responsibility Account, as the case may be, or one crore rupees, whichever is less, and every officer of the company who is in default shall be liable to a penalty of one-tenth of the amount required to be transferred by the company to such Fund specified in Schedule VII, or the Unspent Corporate Social Responsibility Account, as the case may be, or two lakh rupees, whichever is less. Further, as on date the company has deposited the unspent CSR amount in the fund prescribed under Schedule VII of the Companies Act, 2013 and as on the date there is NIL unspent CSR amount of the company.

Further, the board structure of the company was not duly constituted from FY 2022-23 till March 2024 as per the provisions of section 152 of the Companies Act, 2013. However as on date of our company has complied with the provisions of section 152 by according board of director and shareholders' approval and the consequent filing of e-form DIR-12 for the same has been filed with Registrar of Companies, Mumbai. Consequently, the company did not constitute the Audit Committee and the Nomination & Remuneration Committee, resulting in non-compliance with Sections 152, 177, 178 of the Companies Act, 2013 read with rules made thereunder and is subject to penalty under section 159 which states that the such individual or director of the company shall be liable to a penalty which may extend to fifty thousand rupees and where the default is a continuing one, to a further penalty which may extend to five hundred rupees for each day after the first during which such default continues.

Further, our company had not complied with Accounting Standards AS-15 in the past, however the same have been duly complied by the company in the restated financial statements. Although, no show cause notice in respect of the above has been received by the Company till date, any penalty imposed for such non-compliance in future by any regulatory authority could affect our financial conditions to that extent.

6. *We are heavily reliant on a limited number of suppliers for raw materials, coupled with the absence of long-term agreements, exposes us to significant risks of supply disruptions, price fluctuations, and quality issues, which could adversely affect our business operations, financial condition, and results of operations.*

During the Fiscal 2024, Fiscal 2023, and Fiscal 2022, our cost of goods sold (cost of materials consumed, purchase of stock in trade, and changes in inventories of finished goods) was ₹12,718.32 lakhs, ₹12,459.25 lakhs, and ₹13,343.77 lakhs respectively, which represented 88.41%, 89.38%, and 91.85% of our revenue from operations. The raw materials we use in our manufacturing process are primarily sourced from local suppliers in India. We usually do not enter into long-term supply contracts/agreements with any of our raw material suppliers and typically source raw materials from the open market. The absence of long-term contracts/agreements at fixed prices exposes us to volatility in the prices of raw materials that we require, and we may be unable to pass these costs onto our customers, which may reduce our profit margins.

We face a risk that one or more of our existing suppliers may discontinue their supplies to us, and any inability on our part to procure raw materials from alternate suppliers in a timely manner, or on commercially acceptable terms, may adversely affect our business, financial condition, and results of operations. The quality of our products is primarily derived from the quality of our raw materials, and any deterioration in the quality of raw materials supplied to us will have an adverse effect on the quality of our products, market reputation, and sales volumes. There can be no guarantee that we will be able to maintain our current line-up of suppliers or an adequate supply of such raw materials at all times.

Further, our Company has outstanding dues of trade payables during the Fiscals 2024, 2023, and 2022 of ₹2,796.06 lakhs, ₹2,458.40 lakhs, and ₹3,390.66 lakhs respectively. Any delay in payment to our creditors may impact our long-standing relations with our suppliers and may result in the stoppage of timely or at all delivery of raw material. Any such disruption would impact the production and overall financial position of our Company. Our top ten suppliers for raw materials and pigments we sell contributed approximately 70.53%, 58.57%, and 62.47% of our total purchases for the periods ending March 31, 2024, March 31, 2023, and March 31, 2022. Our top suppliers may vary from period to period depending on the demand-supply in the market, and thus the supply process from these suppliers might change as we continue to seek more cost-effective suppliers in the normal course of business.

Since at present our business is concentrated among relatively few significant suppliers, we could experience a reduction in our purchases and business operations if we lose one or more of these suppliers, including but not limited to on account of any dispute or disqualification. There may be an adverse effect on our purchases and business operations. We strive to maintain good and long-term relationships with our suppliers, but there can be no assurance that we will continue to have such long-term relationships with them. We cannot assure that we shall do the same quantum of business, or any business at all, with these suppliers, and the loss of business with one or more of them may adversely affect our purchases and business operations. Our suppliers are associated with us through purchase orders, and we do not enter into definite-term agreements with them. Accordingly, our suppliers may not perform their obligations in a timely manner or at all, resulting in possible delays to our production schedule and adversely affecting our output, and may require us to transition our work to other companies. Further, there can be no assurance that increased demand, capacity limitations, or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials and components. Additionally, there can be no assurance that the material supplied by our suppliers shall always conform to our quality system requirements, including meeting the desired specifications and/or test requirements. Furthermore, as we typically do not have exclusive arrangements with our suppliers, our suppliers could engage with our competitors and prioritize supplies to their other customers, which could adversely impact our ability to procure a sufficient quantity of raw materials and components at competitive rates.

7. *Our reliance on certain industries for a significant portion of our sales could have an adverse effect on our business.*

We are primarily engaged in the business of manufacturing of blue pigment and the trading of chemicals and food colours finding its application in plastic, rubber, textiles, paper, printing inks, paints and coating industries. Consequently, our revenues are dependent on the end user industries that use our products as an input. The table set forth below provides customer segment split of our revenue from operations for Fiscal 2024, Fiscal 2023 and Fiscal 2022.

(₹ in lakhs)

Industry Segment	Fiscal 2024	%	Fiscal 2023	%	Fiscal 2022	%
Paints & Coating	3,696.58	25.70%	2,198.36	15.77%	2,794.28	19.23%
Plastic	1,596.84	11.10%	1,715.48	12.31%	2,664.88	18.34%
Printing Inks	6,092.55	42.35%	6,224.02	44.65%	5,835.53	40.17%
Textiles	1,065.55	7.41%	1,293.83	9.28%	1,340.31	9.23%
Others	1,933.50	13.44%	2,507.33	17.99%	1,892.46	13.03%
Total	14,385.01	100%	13,939.03	100%	14,527.46	100%

Factors affecting any of these industries in general, or any of our customers in particular, could have a cascading adverse effect on our business, financial condition and results of operations. Such factors include, but are not limited to, the following:

- seasonality of demand for our customers' products, which may cause our manufacturing capacities to be underutilized during specific periods;
- our customers' failure to successfully market their products or to compete effectively;
- change in any registration requirements or non-renewal of registrations or imposition of a regulatory ban, or trade sanctions imposed across the country or any such restrictions on the business or product or customer's final product;
- loss of market share, which may lead our customers to reduce or discontinue the purchase of our products;
- economic conditions of the markets in which our customers operate;
- regulatory issues faced by these industries in India and internationally;
- downturns or industry cycles that impact demand; and
- changes in technology or consumer tastes and requirements that alter demands for our products.

8. We derive a majority portion of our revenues from exports and are subject to risk of international trade.

We have historically derived a significant portion of our revenue from exporting to other countries. The top three countries where the major export was done in last three fiscals are Vietnam, the UAE, Nigeria, Brazil, Mexico and China. Other countries include Poland, the USA, Netherlands, Russia, Spain, Mexico, Turkey, Malaysia, Thailand and Uzbekistan, etc. Our revenue from domestic and export sales is as under:

(in ₹ Lakhs except percentage)

Revenue from Operations	FY 2023-24	% of revenue from operations	FY 2022-23	% of revenue from operations	FY 2021-22	% of revenue from operations
Domestic	2,957.64	20.56%	1,618.87	11.61%	1,686.21	11.61%
Export	11,427.37	79.44%	12,320.16	88.39%	12,841.25	88.39%
Total	14,385.01	100.00%	13,939.03	100.00%	14,527.46	100.00%

Therefore, any adverse developments in the global economy or the industries in which our customers operate could have an impact on our sales from exports. From time to time, tariffs, quotas and other tariff and non-tariff trade barriers may be imposed on our products in jurisdictions in which we operate or seek to sell our products. There can be no assurance that the countries where we export, among others, where we seek to sell our products will not impose trade restrictions on us in future. We may also be prohibited from exporting to certain restricted countries that may be added to a sanctions list maintained by the Government of India or other foreign governments. Any such imposition of trade barriers may have an adverse effect on our results of operations and financial condition.

Our operations are subject to risks that are specific to each country from where our customers operate, including:

- Social, economic, political, geopolitical conditions and adverse weather conditions, such as natural disasters, civil disturbance, terrorist attacks, war or other military action, which may adversely affect our business and operations;
- Compliance with local laws, including legal constraints on ownership and corporate structure, environmental, health, safety, labour and accounting laws, which may impose onerous and costly obligations on our multinational customers.
- Changes in foreign laws, regulations and policies, including restrictions on trade, import and export license requirements, and tariffs and taxes, intellectual property enforcement issues and changes in foreign trade and investment policies and
- Fluctuations in foreign currency exchange rates against the Indian Rupee

In addition, our revenues from these markets may decline as a result of increased competition, regulatory action, pricing pressures including as a result of anti-dumping measures, fluctuations in the demand for or supply of our products or services. Our failure to effectively react to these situations or to successfully introduce new products in these markets could adversely affect our business, prospects, results of operations and financial position. Further, our international operations are subject to risks that are specific to each country and region in which we operate, as well as risks associated with international operations, in general. These risks include complying with changes in foreign laws, regulations and policies, including restrictions on trade, import and export license requirements, and tariffs and taxes, intellectual property enforcement issues and changes in foreign trade and investment policies. In the event we are unable to effectively address or comply with changes in foreign laws, or meet the conditions stipulated in our licenses, we may be subject to penalties and other regulatory actions, which could adversely affect our reputation, business, prospects, result of operations and financial condition.

9. We are exposed to foreign currency fluctuations risks, particularly in relation to export of products, which may adversely affect our results of operations, financial condition and cash flows.

We export our products to different countries such as Vietnam, Brazil, Mexico, Nigeria, Russia, Turkey, Netherlands, Poland, China, Spain, Malaysia, Thailand, United Arab Emirates and Uzbekistan and payment for these sales is received in foreign currency. Any appreciation in Rupee against these foreign currencies would adversely affect the export value of the products. During the FY 2023-24, 2022-23 and 2021-22 the exports accounted for approximately Rs.11,427.37 lakhs, Rs. 12,320.16 lakhs and Rs. 12,841.25 lakhs respectively. The exchange rate between Rupee and these foreign currencies has fluctuated substantially in recent years and may continue to fluctuate significantly in the future. The foreign exchange gain/(loss) during the FY 2023-24, 2022-23 and 2021-22 accounted for Rs. 279.92 lakhs, Rs. 229.22 lakhs and Rs. 255.46 lakhs respectively. We bear the complete risk of currency exchange rate fluctuations.

For Fiscal 2024, our revenue from operations were ₹ 14,385.01 lakh of which approximately 79.44% of the revenue were from international markets and remaining 20.56% were from India. Change in the value of currencies with respect to the Rupee may cause fluctuations in our operating results expressed in Rupees. The Exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in future. Any adverse or unforeseen fluctuations with respect to the unhedged exchange rate of any foreign currency for Indian Rupees may affect our company's results of operations. We are not involved in the hedging of foreign currency which would result in losses and gains resulting from translation of foreign currency denomination on our financials. We are subject to the risks associated with carrying out business operations on an international scale, including the following, the occurrence of any of which may adversely affect our business, results of operations, financial condition, cash flows and future prospects:

- Import and export regulations that could among others erode profit margins or restrict imports or exports, changes in foreign exchange controls and tax rates, foreign currency exchange rate fluctuations, including devaluations.
- Changes in regional and local economic conditions, including local inflationary pressures, economic cycle and demand for products in the international markets;
- Changes in laws and regulations, unsettled political conditions and possible terrorist attacks against countries where we sell our products or have other interests;

In the event that we are unable to anticipate and effectively manage these and other risks, it could have a material and adverse effect on our business, results of operations, financial condition, cash flows and future prospects.

10. We have significant working capital requirements. If we experience insufficient cash flows from our operations or are unable to borrow to meet our working capital requirements, it may materially and adversely affect our business, cash flows and results of operations.

Our business requires significant working capital including in connection with our manufacturing operations, financing our inventory, purchase of raw materials and our development of new products which may be adversely affected by changes in terms of credit and payment. A large amount of our working capital is blocked in trade receivables and inventories. Delays in payment under on-going purchase orders or reduction of advance payments and/or accelerated payments to suppliers, could adversely affect our working capital, lower our cash flows and materially increase the amount of working capital to be funded. Currently, our working capital requirements have shown significant variations over the audited periods, driven by changes in the days of inventories, trade receivables, and trade payables. Specifically, the days of inventories increased from 45 days as of March 31, 2022, to 51 days as of March 31, 2023, indicating a longer holding period for inventory, which ties up more capital and raises carrying costs. Additionally, the days of trade receivables increased from 76 days to 88 days over the same period, suggesting delayed collections from customers and further straining cash flow. While the days of trade payables initially rose from 82 days to 93 days, they decreased to 75 days by March 31, 2024, implying faster payments to suppliers and increased cash outflows.

We may also be unable to adequately finance our working capital requirements on account of various factors, including extraneous factors such as delay in disbursements under our financing arrangements, increased interest rates, insurance or other costs, or borrowing and lending restrictions or finance our working capital requirements on commercially acceptable terms or at all, devolvement of our bank guarantees by our bankers etc., each of which may have a material adverse effect on our business, financial condition, prospects and results of operations. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations.

Our inability to generate sufficient cash flows in the future could adversely affect our ability to fund ongoing and future projects, capital expenditures, and other critical liquidity needs. If we cannot maintain or improve our cash flow performance, we may struggle to finance new investments, support operational activities, or meet financial obligations. Such difficulties could materially impair our business operations, hinder growth prospects, and negatively impact our overall financial health. For a comprehensive understanding of our financial position, please refer to the **“Restated Financial Statements”** on page 141 of this Red Herring Prospectus.

11. Our Company has had a negative operating cashflow in two fiscal years. Sustained negative cash flow could adversely impact our business, financial condition and results of operations

The detailed break up of operating cash flows is summarized in below mentioned table and our Company had reported negative operating cash flow for the two fiscal years, 2021-22 & 2023-24. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

This may lead to cancellation of supply orders by our customers. As a result, any failure on our part to maintain applicable standards and manufacture products according to prescribed quality specifications, may lead to loss of reputation of our Company, cancellation of the order, loss of customers, rejection of the product, which will require us to incur additional cost to replace the rejected product, all or any of which could have adverse effect on our business and financial condition, although, no such instance occurred in the past, by the Company till date. Additionally, it could expose us to monetary liability and/ or litigation. Further our facilities, process and products are exposed to regular inspection and audits by our customers to ensure that their internal standards are appropriately met. There can be no assurance that we will, in the future, be able to renew the agreements for the existing locations on same or similar terms, or will be able to find alternate locations for the offices on similar terms favourable to us, or at all. We may also fail to negotiate the renewal of our rent agreements for our premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, affecting our financial condition and operations. 14. The Company aims to achieve 100% capacity utilization in FY 2024-25 and wish to acquire the businesses in similar areas for which the targets have not yet been identified.

As part of its inorganic growth strategy, the company is actively exploring acquisition opportunities in business that operate in similar areas to expand its capacity, specifically those in colors and pigments that are currently trading. However, specific targets have not yet been identified. Moreover, the combined impact of these factors could adversely affect the company's business operations, future prospects, and financial performance and opportunity costs. There is no guarantee that the acquisition will be completed or that it will meet the expected strategic and financial objectives, which could negatively impact the Company's overall strategic goals and performance.

16. Inventories and trade receivables form a major part of our current assets. Failure to manage our inventory and trade receivables could have an adverse effect on our sales, profitability, cash flow and liquidity.

Our Company's business is working capital intensive and hence, inventories and trade receivables form a major part of our current assets. The results of operations of our business are dependent on our ability to effectively manage our inventory and trade receivables. To effectively manage our inventory, we must be able to accurately estimate customer demand / potential orders and supply requirements and purchase new inventory accordingly. However, if we misjudge expected customer demand/ Potential orders, it could cause either a shortage of products or an accumulation of excess inventory. During the FY 2023-24, 2022-23 and 2021-22 our inventories were ₹ 1,758.69 lakhs, ₹ 1,453.02 lakhs and ₹ 1,955.53 lakhs.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if we fail to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. During the FY 2023-24, 2022-23 and FY 2021-22 our trade receivables were ₹ 4,442.17 lakhs, ₹ 3,387.77 lakhs and ₹ 3,323.64 lakhs respectively. As on March 31, 2024 our outstanding due from the top debtor amounted to ₹ 373.55 lakhs representing 8.41% of our total debtors. We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time stipulated by our agreements, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations. Such situation may require an additional and, consequently, higher finance cost which will adversely impact our profitability.

17. We are subject to increasingly stringent environmental, health and safety laws, regulations and standards. Non-compliance with and adverse changes in health, safety, labour, and environmental laws and other similar regulations to our manufacturing operations may adversely affect our business, results of operations and financial condition.

We are subject to a wide range of laws and government regulations, including in relation to safety, health, labour, and environmental protection. These safety, health, labour, and environmental protection laws and regulations impose controls on air and water release or discharge, noise levels, storage handling, treatment, processing, along with other aspects of our manufacturing operations. For instance, there is a limit on the amount of pollutant discharge that our manufacturing facility may release into the air and water. Environmental laws and regulations in India have become and continue to be more stringent, and the scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted with any certainty. In case of any change in environmental or pollution regulations, we may be required to invest in, among other things, environmental monitoring, pollution control equipment, and emissions management and other expenditure to comply with environmental standards. Any failure on our part to comply with any existing or future regulations applicable to us may result in legal proceedings, including public interest litigation being commenced against us, third party claims or the levy of regulatory fines. Further, any violation of the environmental laws and regulations may result in fines, criminal sanctions, revocation of operating permits, or shutdown of our manufacturing facility. The occurrence of any of these events could have an adverse effect on our business, results of operations and financial condition.

As a consequence of unanticipated regulatory or other developments, future environmental and regulatory related expenditures may vary substantially from those currently anticipated. We cannot assure you that our costs of complying with current and future environmental laws and other regulations will not adversely affect our business, results of operations or financial condition. In addition, we could incur substantial costs, our products could be restricted from entering certain markets, and we could face other sanctions, if we were to violate or become liable under environmental laws or if our products become non-compliant with applicable regulations. Our potential exposure includes fines and civil or criminal sanctions, third-party property damage or personal injury claims and clean-up costs. The amount and timing of costs under environmental laws are difficult to predict. We cannot assure you that we will not be involved in future litigation or other proceedings, or be held liable in any litigation or proceedings including in relation to safety, health and environmental matters, the costs of which may be significant.

18. We face competition from both domestic as well as multinational corporations and our inability to compete effectively may have a material adverse impact on our business, financial condition and results of operations.

We face competition in our business based on pricing, relationships with customers, product quality, customization, and innovation. We face pricing pressures from companies, that are able to produce such products at competitive costs and consequently, may supply their products at cheaper prices. We are unable to assure you that we shall be able to meet the pricing pressures imposed by such domestic or multinational competitors which would adversely affect our business, financial condition and results of operations. Additionally, some of our competitors may have greater financial, research and technological resources, larger sales and marketing teams and more established reputation. They may also be in a better position to identify market trends, adapt to changes in industry, innovate and develop new products, offer competitive prices due to economies of scale and also ensure product quality and compliance.

19. Our Group company is engaged in similar line of business as of ours. There is no non-compete agreements between our company and such other entity. We cannot assure that our Promoters will not be favor the interests of such Companies over our interest or that the said entities will not expand which may increase our competition, which may adversely affect business operations and financial condition of our company.

We have not entered into any non-compete agreement with such entity. We cannot assure that our Promoters who has common interest in said entities will not favour the interest of the said entities. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and our Group Company in circumstances where our respective interests conflict. In cases of conflict, our individual Promoters may favour the other entity rather than our Company. There can be no assurance that our Promoters or our Group Companies will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations.

20. Our Company operates under several statutory and regulatory approvals in respect of our operations. Failure to obtain or maintain licenses, registrations, permits and approvals may affect our business and results of operations.

Our business operations necessitate various statutory and regulatory permits, licenses, and approvals. While we believe that we have acquired the necessary permits and licenses essential for our business operations, we cannot guarantee that we have identified every statutory or regulatory requirement that may apply to our operations. Additionally, some of these approvals have finite durations and mandate periodic renewals. We are obligated to ensure the renewal of these permits, licenses, and approvals. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

Further, TAN Certificate of the company is not traceable. Our Company has presently obtained the requisite registrations. We cannot assure you that the approvals, licenses, registrations and permits required will be issued to us and those already issued will not be suspended or revoked in the event of non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any denial, suspension or revocation of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations. For further details regarding the material approvals, licenses, registrations and permits, which have not been obtained by our Company or are, pending renewal, see **“Government and Other Approvals”** on page 188 of this Red Herring Prospectus.

21. We are dependent on our promoter and senior management and other key personnel, and the loss of, or our inability to attract or retain, such persons could affect our business, results of operations, financial condition and cash flows.

Kabir Radheyshyam Sharma and Rohit Krishnakumar Sharma, both Executive Directors, have 9 years of experience each. They have gained significant experience in this line of business and have built strong relationships with suppliers, customers, regulators over the years. They have been actively involved in the day-to-day operations and management of our Company. We believe that the inputs and experience of our senior management, particularly those mentioned, are valuable for the procurement of raw materials, pigments and successful delivery of products, and overall business operations. For more details regarding the experience of our key management personnel, see **“Our Management”** on page 120 of this Red Herring Prospectus.

However, we cannot assure you that these individuals or any other member of our senior management team will not leave us, join a competitor, or that we will be able to retain such personnel or find adequate replacements in a timely manner, if at all. 23. If we are unable to manage our growth effectively and further expand into new markets our business, future financial performance and results of operations could be materially and adversely affected.

The success of our business will depend on our ability to effectively implement our business and growth strategy. As part of our growth strategy, we aim to, among other things, continue to grow our businesses as and when opportunities exist including by Continuing to strengthen our existing product portfolio with attractive growth and profitability prospects, to strive for cost efficiency, attracting and retaining talented employees and focusing on consistently meeting quality standards

As we continue to grow our business and expand into newer markets, we may face several challenges, including as set forth below:

- acquiring new customers;
- identifying customer requirements and preferences in such markets;
- obtaining approvals and certifications for our products in such jurisdictions;
- making accurate assessments of the resources we will require;
- preserving a uniform culture, values and work environment;
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, internal control and other internal systems;
- recruiting, training and retaining sufficient skilled management, technical and marketing personnel;
- maintaining high levels of customer satisfaction; and
- adhering to expected performance and quality standards.

In pursuing our growth strategy, we will require additional capital investments and cash outlays, which may have a material impact on our cash flows and results of operations.

Our operating expenses and capital requirements may increase significantly pursuant to our expansion plans. Our ability to manage our growth effectively requires us to forecast accurately our sales, growth and manufacturing capacity and to expend funds to improve our operational, financial and management controls, reporting systems and procedures. An inability to implement our future business plan, manage our growth effectively, further expand into new markets or failure to secure the required funding on favourable terms or at all could have a material and adverse effect on our business, future financial performance and results of operations.

24. Our contingent liabilities as stated in our Restated Financial Statements could affect our financial condition.

25. The cost of implementing new technologies for our operations could be significant and could adversely affect our business, financial condition and results of operations.

Our future success may depend in part on our ability to respond to technological advances and emerging standards and practices on a cost effective and timely basis. We cannot assure you that we will be able to successfully make timely and cost-effective enhancements and additions to the technology, keep up with technological improvements in order to meet our customers’ needs or that the technology developed by others will not render our products less competitive or attractive. In addition, rapid and frequent technology and market demand changes can often render existing technologies and equipment obsolete, requiring substantial new capital expenditures or write-down of assets. Our failure to successfully adopt such technologies in a cost effective and a timely manner could increase our costs (in comparison to our competitors who are able to successfully implement such technologies) and lead to us being less competitive in terms of our prices or quality of services we provide. Further, implementation of new or upgraded technology may not be cost effective, which may adversely affect our profitability. Any of the above events may adversely affect our business, financial condition, results of operations and prospects.

26. Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business

Our operations are subject to risks inherent in manufacturing facilities such as risk of equipment failure, work accidents, fire, earthquakes, flood and other force majeure events, acts of terrorism and explosions including hazards that may cause injury and loss of life, severe damage to and the destruction of property and equipment and environmental damage. Our significant insurance policies consist of, among others, industry care package policy for our factory premises in respect of building, stock & plant & machinery, keyman insurance and vehicle insurance. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks such as machinery breakdown, goods in transit, product liability insurance and insurance in respect of assets situated at Administration office. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

27. We are dependent on third party transportation providers for the delivery of our raw material and products. Accordingly, continuing increases in transportation costs or unavailability of transportation services may have an adverse effect on our business, financial condition, results of operations and prospects.

We do not maintain an in-house transportation facility and depend on third-party transportation and logistics services at every stage of our business activities, including procurement from suppliers and delivering finished products to customers. While we engage transportation companies as needed, we have not established definitive agreements with any third-party transport service providers. The transportation solutions available in the markets where we operate are typically fragmented, and the cost incurred for goods transported by third-party carriers often exceeds the contracted transportation fees. Consequently, recovering compensation for damaged, delayed, or lost goods can be challenging. Recent instances, such as transportation vehicles being on strike due to fuel price increases, resulted in delays and potential disruptions in handling and procurement processes, which could have led to possible damage to products in transit. Although no such instances have been noticed as on date but such instances if occur may affect our business operations.

28. Activities involving our manufacturing process can cause injury to people or property in certain circumstances. A significant disruption at any of our manufacturing facilities may adversely affect our production schedules, costs, sales and ability to meet customer demand.

Although we employ safety procedures in the operation of our manufacturing facilities and maintain what we believe to be adequate insurance, there is a risk that an accident may occur at any of our manufacturing facilities. Although, no injury to people or property in the Company in the past 3 financial years, an accident may result in personal injury to our employees, destruction of property or equipment, environmental damage, manufacturing or delivery delays, or may lead to suspension of our operations and/or imposition of liabilities. Any such accident may result in litigation, the outcome of which is difficult to assess or quantify, and the cost to defend such litigation can be significant. As a result, the costs to defend any action or the potential liability resulting from any such accident or death or arising out of any other litigation, and any negative publicity associated therewith, may have a negative effect on our business, financial condition, results of operations, cash flows and prospects. In particular, if operations at our manufacturing facility were to be disrupted as a result of any significant workplace accident, equipment failure, natural disaster, power outage, fire, explosion, terrorism, adverse weather conditions, labour dispute, obsolescence or other reasons, our financial performance may be adversely affected as a result of our inability to meet customer demand or committed delivery schedules for our products.

29. The markets in which we compete are characterized by consumers and their rapidly changing tastes and preferences and therefore as a result our Company may be affected by any disruptions in the industry.

We are in the business of manufacturing of pigments and trading of chemicals and food colours used in wide range of industries. Our products are majorly used for commercial and household consumption or usage. Thus, the markets in which we compete are characterized by changing consumer tastes, preferences, evolving industry standards and continuous improvements in product quality and variants. These conditions frequently result in short product life cycles. Moreover, we are dependent on the spending habits of the consumers in India. If the end-user demand is low, we may see significant changes in orders from our customers and may experience greater pricing pressures. If technologies or standards supported by us become obsolete or fail to gain widespread commercial acceptance, we may experience a reduced demand for our products which may result in a decline in sales and in operating margins.

30. None of our Directors possess experience of being on the board of any listed company.

None of our Directors possess experience of being on the board of any listed company and accordingly, may not be adequately well-versed with the activities or industry practices undertaken by the listed company. We cannot assure you that this lack of adequate experience will not have any adverse impact on the management and operations of our Company.

Our Company will also be subject to compliance requirements under the SEBI Listing Regulations and other applicable law post listing of the Equity Share on the Stock Exchanges. Our Board is capable of efficiently managing such compliance requirements including by engaging professionals having expertise in managing such compliances.

31. We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company's financial condition and results of operations.

Our Company has entered into various transactions with our directors, promoters, promoter group and group entities. These transactions, inter-alia includes sales, remuneration, loans and advances etc. For details, please refer to “Annexure XXXI - Related Party Transactions” under Section titled “Financial Information of the Company” and Chapter titled “Capital Structure” beginning on page 166 and 56 respectively of this Red Herring Prospectus. Our Company has entered into such transactions due to easy proximity and quick execution in accordance with Companies Act 2013 and other applicable laws. Although all related-party transactions that we may enter into in the future are subject to approval by our Audit Committee, Board or shareholders, as required under the Companies Act, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favourable terms if such transactions are not entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

32. Under-utilization of our manufacturing capacities may have an adverse effect on our business, future prospects and future financial performance. Moreover, information relating to capacity utilization of our production facility included in this Red Herring Prospectus is based on certain assumptions and has been subjected to rounding off, and future production and capacity utilization may vary.

Our capacity utilization levels are dependent on our ability to carry out uninterrupted operations at manufacturing facilities as well as on the market demand of the products sold by us. Among others, the capacity utilization also depends upon the availability of raw materials, labour, industry/ market conditions and procurement practice followed by our customers. During the Fiscals 2024, 2023 and 2022, our overall capacity utilization is detailed below: -

Particulars	2023-24 MTPA	2022-23 MTPA	2021-22 MTPA	Existing capacity (p.a.)	installed
Installed Capacity (Production Beta Blue)	1977.60	1977.60	1977.60	1977.60	
Actual Production	1878.00	1680.00	1581.00		
Capacity Utilization (in %)	95%	85%	80%		

*The information related to the installed capacity is based on the certificate received from A.D. Joshi, Chartered Engineers & Valuers LLP vide their certificate dated June 13, 2024.

In the event we are unable to achieve considerable capacity utilization of our current manufacturing facility, it would result in operational inefficiencies which could have a material adverse effect on our business, results, financial condition and future prospects. Under-utilization of our manufacturing capabilities over extended periods, or significant under-utilization in the short term, could materially and adversely impact our business, growth prospects and future financial performance.

33. The Objects of the Issue for which funds are being raised, are based on our management estimates and have not been appraised by any bank or financial institution or any independent agency.

The deployment of funds will be entirely at our discretion, based on the parameters as mentioned in the chapter titled “Objects of the Issue”. The fund requirement and deployment, as mentioned in the section titled “Objects of the Issue” on page 69 of this Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

34. Any variation in the utilization of the Net Proceeds as disclosed in this Red Herring Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company.

We propose to utilize the Net Proceeds for Repayment of a portion of certain borrowing availed by our company, Funding to meet working capital requirements and general corporate purposes. For further details of the proposed objects of the Issue, see “Objects

of the Issue” beginning on page 69 of this Red Herring Prospectus. However, these objects of the Issue have not been appraised by any bank, financial institution or other independent agency. Further, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with the Companies Act, 2013 and the SEBI ICDR Regulations, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Red Herring Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations. Further, our Promoters would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Issue, at a price and manner as prescribed by SEBI. Additionally, the requirement to provide an exit opportunity to such dissenting shareholders of our Company may deter our Promoters from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoter will have adequate resources at their disposal at all times to enable them to provide an exit opportunity. In light of these factors, we may not be able to vary the objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition, if any, which may adversely affect our business and results of operations.

35. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained mentioned under chapter titled Industry Overview in the Red Herring Prospectus.*

While facts and other statistics in the Red Herring Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various governmental and organizational web site data that we believe are reliable, we cannot guarantee the quality or reliability of such materials. These data has been taken from the website such as <https://openknowledge.worldbank.org/>; <https://openknowledge.worldbank.org/>; <https://pib.gov.in/>; and <https://www.ibef.org/> for which we have taken the NOC, where required. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “*Industry Overview*” beginning on page 84 of this Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

36. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

37. *We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.*

The proposed fund requirement as detailed in the section titled “*Objects of the Issue*” is to be funded from the proceeds of this Issue. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled “*Objects of the Issue*” beginning on page 69 of this Red Herring Prospectus.

38. *Our Promoter and Promoter Group members has provided personal guarantees for loans availed by our Company. Our business, financial condition, results of operations and cash flows may be adversely affected by the invocation of all or any personal guarantees provided by our Promoter and Promoter Group members.*

Our Promoter and Promoter Group Members has provided personal guarantees to secure a significant portion of our existing borrowings, and may post listing continue to provide such guarantees and other security. In case of a default under our loan agreements, any of the personal guarantees provided by our Promoter and Promoter Group Members may be invoked, which could negatively impact the reputation of our Company. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. In addition, our Promoter and Promoter Group Members may be required to liquidate his shareholding in our Company to settle the claims of the lenders, thereby diluting his shareholding in our Company. We

may also not be successful in procuring alternate guarantees satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer “*Statement of Financial Indebtedness*” on page no. 174 of this Red Herring Prospectus.

39. *Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows and working capital requirements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the Section “*Dividend Policy*” on page 140 of the Red Herring Prospectus.

40. *There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹10,000.00 lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the Audit Committee of our company will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

41. *Technology failures or Cyber-attacks or other security breaches could have a material adverse effect on our business, results of operation or financial condition*

IT systems are critical to our ability to manage our operations. Our IT systems enable us to coordinate our operations, from planning, production scheduling, raw material ordering, invoicing, delivery, customer relationship, management and decision support. If we do not allocate and effectively manage the resources necessary to build and sustain the proper IT infrastructure, we could be subject to transaction errors, processing inefficiencies, customer service disruptions and, in some instances, loss of customers.

We face cyber threats, threats to the physical security of our facilities and employees, the potential for business disruptions associated with IT failures, natural disasters, or public health crises. We have installed anti-virus software to prevent our systems and infrastructure from being infected and crippled by computer viruses. All our internet facing servers installed at all our data centres as well as at all our offices are also secured with firewalls and intrusion preventions systems to prevent hacking. If we are unable to protect sensitive information, our customers could question the adequacy of our threat mitigation and detection processes and procedures. Due to the evolving nature of these security threats, the impact of any future incident cannot be predicted.

42. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the Issue Price.*

Our Promoters average cost of acquisition of Equity Shares in our company may be lower than the Issue Price as may be decided by the company in consultation with the Book Running Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter “*Capital Structure*” beginning on pages 56 of this Red Herring Prospectus.

43. *Our Promoters and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.*

Our promoters along with the promoter group will continue to hold collectively 73.56% of the post issue paid up share capital of the company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholder’s vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoters and promoter group will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

44. *We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.*

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from

time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favorable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt - equity ratio to increase or require us to create charges or liens on our assets in favor of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

45. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares will be determined by our Company in consultation with the BRLMs through the Book Building Process. This price will be based on numerous factors, as described under "**Basis for the Issue Price**" on page 77 and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, problems such as temporary closure, broker default and settlement delays experienced by the Indian Stock Exchanges, strategic actions by us or our competitors, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. Consequently, the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share price could fluctuate significantly because of market volatility. A decrease in the market price of our Equity Shares could cause investors to lose some or all of their investment.

46. *Certain data mentioned in this Red Herring Prospectus under chapter titled Industry Overview has not been independently verified.*

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. These data has been taken from the website such as <https://openknowledge.worldbank.org/>; <https://openknowledge.worldbank.org/>; <https://pib.gov.in/>; and <https://www.ibef.org/> for which we have taken the NOC, where required. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

47. *QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid and Retail Individual Investors are not permitted to withdraw their Bids after Bid/Issue Closing Date.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Bidders can revise their Bids during the Bid/Issue Period and withdraw their Bids until Bid/Issue Closing Date. While we are required to complete Allotment, listing and commencement of trading pursuant to the Issue within six (6) Working Days from the Bid/ Issue Closing Date, events affecting the Bidders' decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows and financial condition may arise between the date of submission of the Bid and Allotment, listing and commencement of trading. We may complete the Allotment, listing and commencement of trading of our Equity Shares even if such events occur and such events may limit the Bidders' ability to sell our Equity Shares Allotted pursuant to the Issue or may cause the trading price of our Equity Shares to decline on listing. Retail Individual Investors can revise their Bids during the Bid/Issue Period and withdraw their Bids until Bid/Issue Closing Date. While our Company is required to complete all necessary formalities for listing and commencement of trading of the Equity Shares

on all Stock Exchanges where such Equity Shares are proposed to be listed including Allotment pursuant to the Issue within six Working Days from the Bid/Issue Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing

48. We may be subject to surveillance measures, such as the Additional Surveillance Measures (ASM) and the Graded Surveillance Measures (GSM) by the Stock Exchanges which may adversely affect trading price of our Equity Shares.

SEBI and Stock Exchanges in order to enhance market integrity and safeguard interest of investors, have been introducing various enhanced pre-emptive surveillance measures. The main objective of these measures is to alert and advice investors to be extra cautious while dealing in these securities and advice market participants to carry out necessary due diligence while dealing in these securities. Accordingly, SEBI and Stock Exchanges have provided for (a) GSM on securities where such trading price of such securities does not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net-worth, price per equity multiple and market capitalization; and (b) ASM on securities with surveillance concerns based on objective parameters such as price and volume variation and volatility.

On listing, we may be subject to general market conditions which may include significant price and volume fluctuations. The price of our Equity Shares may also fluctuate after the Offer due to several factors such as volatility in the Indian and global securities market, our profitability and performance, performance of our competitors, changes in the estimates of our performance or any other political or economic factor. The occurrence of any of the abovementioned factors may trigger the parameters identified by SEBI and the Stock Exchanges for placing securities under the GSM or ASM framework such as net worth and net fixed assets of securities, high low variation in securities, client concentration and close to close price variation.

In the event our Equity Shares are subject to such pre-emptive surveillance measures implemented by any of the Stock Exchanges, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares.

EXTERNAL RISK FACTORS

49. Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows.

Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. Recent developments in the ongoing conflict between Russia and Ukraine has resulted in and may continue to result in a period of sustained instability across global financial markets, induce volatility in commodity prices, increase borrowing costs, cause outflow of capital from emerging markets and may lead to overall slowdown in economic activity in India. In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries.

50. Our business and results of operations could be adversely affected by disruptions in global economic and geo political conditions.

As substantially all of our operations are dependent on our customers who have their head offices or parent companies situated outside India, our financial performance and growth are necessarily dependent on economic conditions prevalent globally. The global economy may be materially and adversely affected by political instability or regional conflicts; a general rise in interest rates; inflation; exchange rate fluctuations; changes in tax, trade, and monetary policies; occurrence of natural or man-made disasters; downgrade in debt rating; and adverse economic conditions occurring elsewhere in the world, such as a slowdown in economic growth in China, the repercussions of the United Kingdom exit from the European Union and other matters.

While the Indian economy has grown significantly in recent years, it has experienced economic slowdowns in the past due to global economic and geo political conditions. The Indian economy in particular could be adversely impacted by inflationary pressures, currency depreciation, the poor performance of its large agricultural and manufacturing sectors, trade deficits, recent initiatives by the Indian government and other factors. Unfavorable changes in the above factors or in other business and economic conditions affecting our customers could result in a corresponding decline in our business.

51. If certain labour laws become applicable to us, our profitability may be adversely affected.

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

52. The continuing effect of the COVID-19 pandemic on our business, results of operations and financial condition is highly uncertain and cannot be predicted.

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could adversely affect the overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines and lockdowns. These measures have impacted and may further impact our workforce and operations, the operations of our consumers. In case there is a rapid increase in severe cases of infections leading to deaths, where the measures taken by governments are not successful or are any bans imposed by the government in this regard are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general. The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession.

53. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by center or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

54. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter "***Government and Other Statutory Approvals***" on page 188 for details of the laws currently applicable to us. The governmental and regulatory bodies in India and other jurisdictions where we operate may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, financial condition, results of operations and cash flows.

In addition, unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies,

income tax, turnover tax, goods and services tax, stamp duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each jurisdiction as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned and expenditures incurred. We are involved in various disputes with tax authorities. For details of these disputes, see **“Outstanding Litigation and Material Developments”** on page 185 of this Red Herring Prospectus. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time.

Any change in Indian tax laws could have an effect on our operations. For instance, the Taxation Laws (Amendment) Ordinance, 2019, a new tax ordinance issued by India’s Ministry of Finance on September 20, 2019, prescribes a number of changes to the income tax rate applicable to companies in India. According to this new ordinance, companies can henceforth voluntarily opt for a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate for Indian companies. Any such future amendments may affect other benefits such as an exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would influence our profitability.

The Finance Act, 2022 (“Finance Act”), has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax (“DDT”), will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non- resident and are likely to be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares. Further, the Government of India has notified the Finance Act, 2023, which has introduced various amendments to taxation laws in India. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

55. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, NSE’s benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

56. *Natural calamities could have a negative impact on the Indian economy and cause Our Company’s business /to suffer.*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

57. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

58. *Our performance is linked to the stability of policies and the political situation in India.*

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

Assumptions for working capital requirements

The following table sets forth the details of the holding period (with days rounded to the nearest whole number) considered for years ended March 31, 2024, March 31, 2023 and March 31, 2022, as well as projections for financial year ended March 31, 2025.

Particulars	Unit	March 31, 2022	March 31, 2023	March 31, 2024	March 31, 2025

Inventories	Days	45	51	46	65
Trade Receivables	Days	76	88	99	105
Trade Payables	Days	82	93	75	60

Justification:

Particulars	Justification
Trade Receivables	Trade days increased from 76 days in FY22 to 88 days in FY23, mainly due to higher goods in transit for international customers. The trade days further rose to 99 days in FY24, reflecting a growth in overall business with revenue increasing from ₹13,939.03 Lakhs in FY23 to ₹14,385.01 Lakhs in FY24, a 3% growth. The company extended larger credit to customers to capture a higher market share, leading to historical holding days of trade receivables ranging from 76 to 99 days between FY22 and FY24. Anticipating further expansion, the holding level for debtors is expected to be 105 days in FY25, with

Particulars	Justification
	revenue projected to grow by 15% to ₹16,542.76 Lakhs. To support this growth and build stronger customer relationships, the company plans to offer extended credit periods, fostering increased sales volume and exploring new business areas to stay ahead of competitors.
Trade Payables	In FY22, trade payables were at 82 days, increasing to 93 days in FY23 as the slowdown from the COVID-19 pandemic caused businesses to resume operations gradually and supply chain issues to improve slowly, resulting in a slower payment cycle. However, trade payables decreased to 75 days in FY24 as the company adopted a strategy of making early payments to suppliers to avail cash discounts and enhance margins, which increased the need for higher working capital. Historically, trade payables holding days ranged from 75 to 93 days between FY22 and FY24, but the holding level is anticipated to be 60 days in FY25. By reducing the settlement time for payables, the company aims to negotiate more favourable terms and conditions with suppliers, access competitive pricing, and strengthen long-term supplier relationships. Offering advance and quick payment terms is expected to provide cash discounts and competitive purchase prices, ultimately increasing the overall profitability of the company.
Inventories	Inventories, which include raw materials, spares, and finished goods, saw a slight increase in holding days from 45 in FY22 to 51 in FY23, followed by a decrease to 46 days in FY24. This stability reflects efficient forecasting and procurement strategies tailored to the export market's specific demands. Historically, inventory holding days have ranged from 45 to 51 days between FY22 and FY24. To support expanding business operations and explore new areas, the company estimates inventory holding days to rise to around 65 in FY25. This increase is due to uncertain demand and the necessity to maintain 2-3 months' worth of inventory to meet sudden orders, as export customers require sufficient stock. Additionally, with the company's revenue projected to grow by over 15%, from ₹14,385.01 Lakhs in FY24 to ₹16,542.76 Lakhs in FY25, higher levels of working capital will be needed to maintain inventory levels and accommodate unexpected demand fluctuations or supply chain interruptions.

Reason for increase in working capital requirements in FY23 as compared to FY22

The working capital requirement has been increased from ₹ 2,764.11 Lakhs in FY2022 to ₹3,227.90 Lakhs in FY2023. As the Covid pandemic get slowed down during this time period, the businesses were started coming back to their normal pace, supply chain problems gets improved, demands were high because increased consumer spending after the pandemic led to a greater need for products. This surge was due to people catching up on delayed purchases and renewed confidence as the economy recovered. As a result, the company's sales remained stable from FY22 to FY23, with only a 4.05% decrease in revenue. all these factors contributed to the high growth in the economy. The reason for large increase in working capital was largely influenced by COVID-19 impact. The company was getting slower payments from their customers due to which it increases the Trade Receivables of the company. Trade receivable cycle has increase from 76 Days in FY22 to 88 Days in FY23. Further, to manage market risks and to avoid any supply chain disruptions the company has maintained higher inventory levels which further led to the increase in working

capital. Inventory holding period has increased from 45 days in FY22 to 51 Days in FY23, which lead to higher working capital requirement.

Reason for increase in working capital requirements in FY24 as compared to FY23

The increase in working capital requirement from ₹3,227.90 Lakhs in FY2023 to ₹4,251.41 Lakhs in FY2024 can be attributed to several factors associated with the company's growth and expansion. Over the years, the company has successfully expanded its exports to many global clients. In fiscal 2024 the company extended its export to countries including Bahrain, Costa Rica, Czech Republic, Dominican Republic, Ethiopia, Slovenia, South Africa, Sri Lanka, Switzerland and Ukraine and in fiscal 2023 to countries like Belgium, Bolivia, Ghana, Kazakhstan, Myanmar, South Korea, Suriname and Venezuela. Despite a modest revenue growth of 3% from ₹13,939.03 Lakhs in FY2023 to ₹14,385.01 Lakhs in FY2024, the company's working capital needs have risen due to several key developments. The Trade Receivables Days increased from 88 days in FY2023 to 99 days in FY2024, reflecting a rise in trade receivables from ₹3,387.77 Lakhs to ₹4,442.17 Lakhs, driven by higher credit sales as the company aimed to capture greater market share. We believe that there are some untapped markets with huge demand and business potential that are yet to be explored by us such as United States of America (USA), Mexico, Peru, Columbia, Japan, Argentina and Canada. Additionally, the expansion of the export business and new market segments has led to a growth in inventory from ₹1,453.02 Lakhs to ₹1,758.69 Lakhs, further increasing the working capital requirement. Moreover, a reduction in Trade Payables Days from 93 days to 75 days, due to a strategy of early payments to suppliers to avail cash discounts, has necessitated a higher amount of working capital to support these new operational dynamics and enhance margins.

GLOBAL ECONOMIC OUTLOOK

Global growth is projected to stabilize at 2.6 percent this year, holding steady for the first time in three years despite flaring geopolitical tensions and high interest rates. It is then expected to edge up to 2.7 percent in 2025-26 amid modest growth in trade and investment. Global inflation is projected to moderate-but at a slower clip than previously assumed, averaging 3.5 percent this year. Given continued inflationary pressures, central banks in both advanced economies and emerging market and developing economies (EMDEs) will likely remain cautious in easing monetary policy. As such, average benchmark policy interest rates over the next few years are expected to remain about double the 2000-19 average.

Despite an improvement in near-term growth prospects, the outlook remains subdued by historical standards in advanced economies and EMDEs alike. Global growth over the forecast horizon is expected to be nearly half a percentage point below its 2010-19 average pace. In 2024-25, growth is set to underperform its 2010s average in nearly 60 percent of economies, representing more than 80 percent of global population and world output. EMDE growth is forecast to moderate from 4.2 percent in 2023 to 4 percent in both 2024 and 2025. Prospects remain especially lackluster in many vulnerable economies—over half of economies facing fragile-and conflict-affected situations will still be poorer by the end of this year than on the eve of the pandemic.

Global risks remain tilted to the downside despite the possibility of some upside surprises. Escalating geopolitical tensions could lead to volatile commodity prices, while further trade fragmentation risks additional disruptions to trade networks. Already, trade policy uncertainty has reached exceptionally high levels compared to other years that have featured major elections around the world since 2000. The persistence of inflation could lead to delays in monetary easing. A higher-for-longer path for interest rates would dampen global activity. Some major economies could grow more slowly than currently anticipated due to a range of domestic challenges. Additional natural disasters related to climate change could also hinder activity. On the upside, global inflation could moderate more quickly than assumed in the baseline, enabling faster monetary policy easing. In addition, growth in the United States could be stronger than expected.

Against this backdrop, decisive global and national policy efforts are needed to meet pressing challenges. At the global level, priorities include safeguarding trade, supporting green and digital transitions, delivering debt relief, and improving food security. At the national level, persistent inflation risks underscore the need for EMDE monetary policies to remain focused on price stability. High debt and elevated debt-servicing costs will require policy makers to seek ways to sustainably boost investment while ensuring fiscal sustainability. To meet development goals and bolster long-term growth, structural policies are needed to raise productivity growth, improve the efficiency of public investment, build human capital, and close gender gaps in the labor market.

Global outlook

The global economy is stabilizing, following several years of negative shocks. Global growth is projected to hold steady at 2.6 percent this year, despite flaring geopolitical tensions and high interest rates, before edging up to 2.7 percent in 2025-26 alongside modest expansions of trade and investment. Global inflation is expected to moderate at a slower clip than previously assumed, averaging 3.5 percent this year. Central banks in both advanced economies and emerging market and developing economies (EMDEs) are likely to remain cautious in easing policy. As such, markedly higher interest rates than prior to the pandemic are set to sustain for an extended period. Despite some improvement, the outlook remains subdued. Global growth over the forecast horizon is expected to be nearly half a percentage point below its 2010-19 average, with a slower pace of expansion in economies comprising over 80 percent of the global population. EMDE growth is projected to moderate from 4.2 percent in 2023 to 4 percent in 2024. Amid heightened conflict and violence, prospects remain especially lackluster in many vulnerable economies—over half of fragile and conflict-affected economies will still be poorer in 2024 than on the eve of the pandemic. Risks have become more balanced but remain tilted to the downside. Escalating geopolitical tensions could lead to volatile commodity prices. In a context of elevated trade policy uncertainty, further trade fragmentation risks additional disruptions to trade networks. More persistent inflation could lead to higher-for-longer interest rates. Other risks include weaker-than anticipated activity in key economies and disasters related to climate

change. Against this backdrop, policy makers face daunting challenges. Global efforts are needed to safeguard trade, support green and digital transitions, deliver debt relief, and improve food security. Still-pronounced inflation risks underscore the need for EMDE monetary policies to remain focused on price stability. High debt and elevated debt-servicing costs will require EMDE policy makers to balance sizable investment needs with fiscal sustainability. To meet development goals, policies are needed to raise productivity growth, improve the efficiency of public investment, build human capital, and close gender gaps in the labor market.

Global prospects

The global economy is stabilizing but the outlook remains subdued—both advanced economies and EMDEs are projected to grow at a slower pace over 2024-26 than in the pre-pandemic decade. Recent upward pressures on global core inflation are anticipated to gradually ease, such that headline inflation converges to levels broadly consistent with central bank targets by 2026. Market expectations for the path of U.S. policy rates have been repeatedly revised higher. Amid elevated borrowing costs, about two-fifths of EMDEs are acutely vulnerable to debt stress. In 2024-25, growth is expected to underperform its 2010-19 average in countries comprising more than 80 percent of global output and population. The multiple shocks of recent years have impeded per capita income catch-up, with almost half of EMDEs losing ground relative to advanced economies over 2020-24.

The global economy is stabilizing, following several years of overlapping negative shocks. Despite elevated financing costs and heightened geopolitical ensions, global activity firmed in early 2024. Global growth is envisaged to reach a slightly faster pace this year than previously expected, due mainly to the continued solid expansion of the U.S. economy. However, the extent of expected declines in global interest rates has moderated amid lingering inflation pressures in key economies. By historical standards, the global outlook remains subdued: both advanced economies and emerging market and developing economies (EMDEs) are set to grow at a slower pace over 2024-26 than in the decade preceding the pandemic (figure A).

Inflation continues to wane globally, making progress toward central bank targets in advanced economies and EMDEs, but at a slower pace than previously expected. Core inflation has remained stubbornly high in many economies, supported by rapid growth of services prices. Over the remainder of 2024, continued tight monetary policy stances and slowing wage increases should help reduce inflation further. By the end of 2026, global inflation is expected to settle at an average rate of 2.8 percent, broadly consistent with central bank targets (figure B)

The anticipated extent of monetary easing in advanced economies this year has diminished substantially since late 2023—by more than a percentage point in the case of the United States. Expected policy rate paths diverge across major economies, as the European Central Bank proceeds with policy easing while the U.S. Federal Reserve keeps rates on hold for longer. Indeed, aside from short-term fluctuations, market expectations for the path of U.S. interest rates have repeatedly moved higher since 2022 (figure C). Despite this market reassessment, global financial conditions have eased this year, reflecting solid risk appetite following last year’s progress on disinflation and diminished concerns about the possibility of a sharp slowdown in global growth. In particular, global equity markets have made sizable gains

EMDE financial conditions similarly became more accommodative early this year, aided by declining domestic policy rates, improving global sentiment, and expected easing of advanced economy monetary conditions. EMDE conditions turned somewhat less accommodative in the second quarter, as a strengthening of the U.S. dollar—prompted by geopolitical tensions and firm inflation data in the United States—coincided with a bout of capital outflows. Although market perceptions of sovereign credit risk have generally eased this year, EMDE borrowing costs continue to be high, and marked divergences persist. Indeed, credit ratings and debt sustainability analyses indicate that about 40 percent of EMDEs remain acutely vulnerable to debt-related stress (figure D).

Across the forecast horizon, global growth remains lackluster by recent historical standards, at about 0.4 percentage point below the 2010-19 average. In 2024-25, growth is set to underperform its average pace in the 2010s in nearly 60 percent of economies, representing more than 80 percent of global output and population (figure 1.1.E). The subdued outlook—despite the anticipated moderation of various cyclical headwinds underscores a secular deceleration of potential growth in many large economies. Relative to prepandemic norms, growth has weakened notably in countries that experienced high rates of inflation, much of which emanated from shocks to supply chains and commodity prices. Yet this trend is set to continue in the coming years, suggesting potentially enduring supply-side weakness.

GDP per capita in EMDEs is forecast to grow at about 3 percent on average over 2024-26, well below the average in 2010-19. Excluding China, EMDE per capita GDP growth is forecast to be lower still, averaging 2.5 percent over 2024-26. Some large EMDEs, such as India, are expected to see continued solid per capita growth. Yet the trend of the 2020s so far is one of uneven and limited progress. Nearly half of EMDEs are set to lose ground relative to advanced economies when viewed over the 2020-24 period (figure F). Although this trend is expected to improve somewhat over 2025-26 in EMDEs as a whole, per capita growth is set to remain stagnant in many LICs and FCS.

INDIAN ECONOMY OUTLOOK

In general, global economic shocks in the past were severe but spaced out in time. This changed in the third decade of this millennium. At least three shocks have hit the global economy since 2020. It all started with the pandemic-induced contraction of the global output, followed by the Russian-Ukraine conflict leading to a worldwide surge in inflation. Then, the central banks across economies led by the Federal Reserve responded with synchronized policy rate hikes to curb inflation. The rate hike by the US Fed drove capital into the US markets causing the US Dollar to appreciate against most currencies. This led to the widening of the Current Account Deficits (CAD) and increased inflationary pressures in net importing economies. The rate hike and persistent inflation also led to a lowering of the global growth forecasts for 2022 and 2023 by the IMF in its October 2022 update of the World Economic Outlook. The frailties of the Chinese economy further contributed to weakening the growth forecasts. Slowing global growth apart from monetary tightening may also lead to a financial contagion emanating from the advanced economies where the debt of the non-financial sector has risen the most since the global financial crisis. With inflation persisting in the advanced economies and the central banks hinting at further rate hikes, downside risks to the global economic outlook appear elevated.

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed. The widening of the CAD may also continue as global commodity prices remain elevated and the growth momentum of the Indian economy remains strong. The loss of export stimulus is further possible as the slowing world growth and trade shrinks the global market size in the second half of the current year.

Despite these, agencies worldwide continue to project India as the fastest-growing major economy at 6.5-7.0 per cent in FY23. These optimistic growth forecasts stem in part from the resilience of the Indian economy seen in the rebound of private consumption seamlessly replacing the export stimuli as the leading driver of growth. The uptick in private consumption has also given a boost to production activity resulting in an increase in capacity utilization across sectors. The rebound in consumption was engineered by the near-universal vaccination coverage overseen by the government that brought people back to the streets to spend on contact-based services, such as restaurants, hotels, shopping malls, and cinemas, among others. The world's second-largest vaccination drive involving more than 2 billion doses also served to lift consumer sentiments that may prolong the rebound in consumption. Vaccinations have facilitated the return of migrant workers to cities to work in construction sites as the rebound in consumption spilled over into the housing market. This is evident in the housing market witnessing a significant decline in inventory overhang to 33 months in Q3 of FY23 from 42 months last year.

The Capital Expenditure (Capex) of the central government, which increased by 63.4 per cent in the first eight months of FY23, was another growth driver of the Indian economy in the current year, crowding in the private Capex since the January-March quarter of 2022. On current trend, it appears that the full year's capital expenditure budget will be met. A sustained increase in private Capex is also imminent with the strengthening of the balance sheets of the Corporates and the consequent increase in credit financing it has been able to generate. A much-improved financial health of well-capitalized public sector banks has positioned them better to increase the credit supply. Consequently, the credit growth to the Micro, Small, and Medium Enterprises (MSME) sector has been remarkably high, over 30.6 per cent, on average during Jan-Nov 2022, supported by the extended Emergency Credit Linked Guarantee Scheme (ECLGS) of the Union government. The increase in the overall bank credit has also been influenced by the shift in borrower's funding choices from volatile bond markets, where yields have increased, and external commercial borrowings, where

interest and hedging costs have increased, towards banks. If inflation declines in FY24 and if real cost of credit does not rise, then credit growth is likely to be brisk in FY24.

India's economic growth in FY23 has been principally led by private consumption and capital formation. It has helped generate employment as seen in the declining urban unemployment rate and in the faster net registration in Employee Provident Fund. Still, private capex soon needs to take up the leadership role to put job creation on a fast track. Recovery of MSMEs is proceeding apace, as is evident in the amounts of Goods and Services Tax (GST) they pay, while the Emergency Credit Linked Guarantee Scheme (ECLGS) is easing their debt servicing concerns. The Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS) has been directly providing jobs in rural areas and indirectly creating opportunities for rural households to diversify their sources of income generation. Schemes like PM-Kisan and PM Garib Kalyan Yojana have helped in ensuring food security in the country, and their impact was also endorsed by the United Nations Development Programme (UNDP). The results of the National Family Health Survey (NFHS) also show improvement in rural welfare indicators from FY16 to FY20, covering aspects like gender, fertility rate, household amenities, and women empowerment.

Global growth has been projected to decline in 2023 and is expected to remain generally subdued in the following years as well. The slowing demand will likely push down global commodity prices and improve India's CAD in FY24. However, a downside risk to the Current Account Balance stems from a swift recovery driven mainly by domestic demand and, to a lesser extent, by exports. The CAD needs to be closely monitored as the growth momentum of the current year spills over into the next. Growth is expected to be brisk in FY24 as a vigorous credit disbursement, and capital investment cycle is expected to unfold in India with the strengthening of the balance sheets of the corporate and banking sectors. Further support to economic growth will come from the expansion of public digital platforms and path-breaking measures such as PM GatiShakti, the National Logistics Policy, and the Production-Linked Incentive schemes to boost manufacturing output.

Economic Survey 2022-23 (Source - <https://www.indiabudget.gov.in/economicsurvey/doc/eschapter/echap01.pdf>)

Despite uncertainty from adverse geopolitical developments and expansionary fiscal measures taken during the COVID-19 pandemic, the Indian economy has demonstrated resilience and maintained healthy macroeconomic fundamentals. As per the First Advance Estimates of National Income of FY 2023-24, India's Real GDP is projected to grow at 7.3 per cent. This was stated in the Macro-Economic Framework Statement 2024-25.

Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in H1 of FY2023-24. On the supply side, industry and services sectors were the primary growth drivers in H1 of FY2023-24. India has registered the highest growth among major advanced and emerging market economies during this period. As per the IMF, India is likely to become the third-largest economy in 2027 in USD at market exchange rate. It also estimates that India's contribution to global growth will rise by 200 basis points in 5 years.

Calling the decade of 2014-23 as the golden era for FDI inflows, Smt. Sitharaman informed the House that the inflow during this period was twice the figure during 2005-14, amounting to USD 596 billion. "For encouraging sustained foreign investment, we are negotiating bilateral investment treaties with our foreign partners, in the spirit of 'First Develop India'", she added.

Macroeconomic stability and improvements in India's external position, particularly significant moderation in the current account deficit and revival of capital flows on the back of a comfortable foreign exchange reserves buffer, resulted in stability in the Indian rupee during FY 2023-24. Further, inflationary pressures in India moderated majorly driven by proactive supply side initiatives by the Government, noted the Macro-Economic Framework Statement 2024-25.

Strategic priorities for FY 2024-25:

The Government's fiscal policy stance has been to make the domestic economy more resilient to exogenous shocks and to mitigate the risks of global economic downturn without compromising on the overall macroeconomic balances. The FY 2024-25 fiscal strategy of the government is based on the following broad intents:

- a. Directing towards more inclusive, sustainable and more resilient domestic economy to absorb the unanticipated shocks, if any;

- b. Channelizing and allocating increased resources towards capital spending to sustain infrastructure development momentum;
- c. Continuing the holistic approach of fiscal federalism towards enhancing the public infrastructure by supporting efforts of the States for capital spending;
- d. Focus on integrated and coordinated planning and implementation of infrastructure projects in the country, embracing the principles of PM Gati Shakti;
- e. Prioritization of expenditure towards the key developmental sectors viz., drinking water, housing, sanitation, green energy, health, education, agriculture, rural development etc. for long run sustainable and inclusive betterment of the citizens;
- f. Enhancing the effectiveness of cash management through just-in-time release of resources by using SNA/TSA system etc.

INDUSTRY SCENARIO- CHEMICAL INDUSTRY

Covering more than 80,000 commercial products, India's chemical industry is extremely diversified and can be broadly classified into bulk chemicals, specialty chemicals, agrochemicals, petrochemicals, polymers, and fertilisers. India is the 6th largest producer of chemicals in the world and 3rd in Asia, contributing 7% to India's GDP. India's chemical sector, which is currently estimated to be worth US\$ 220 billion in 2022 and is anticipated to grow to US\$ 300 billion by 2025 and US\$ 1 trillion by 2040.

Globally, India is the fourth-largest producer of agrochemicals after the United States, Japan and China. India accounts for 16-18% of the world production of dyestuffs and dye intermediates. Indian colorants industry has emerged as a key player with a global market share of ~15%. The country's chemicals industry is de-licensed, except for few hazardous chemicals. India holds a strong position in exports and imports of chemicals at a global level and ranks 14th in exports and 8th in imports at global level (excluding pharmaceuticals).

The domestic chemicals sector's small and medium enterprises are expected to showcase 18-23% revenue growth in FY22, owing to an improvement in domestic demand and higher realisation due to high prices of chemicals. Domestic demand is expected to rise from US\$ 170 billion-US\$ 180 billion in 2021 to US\$ 850 billion-US\$ 1,000 billion by 2040. India's proximity to the Middle East, the world's source of petrochemicals feedstock, enables it to benefit on economies of scale.

- Four Petroleum, Chemicals and Petrochemical Investment Regions (PCPIRs) were set up as the investment regions for petroleum, chemicals and petrochemicals along with associated services.
- The Government of India is considering launching a production-linked incentive (PLI) scheme in the chemical sector to boost domestic manufacturing and exports.

Specialty chemicals – international demand to drive growth

- Specialty chemical companies in India have started accelerating their capex plan on the back of strong growth visibility and emerging
- Opportunities
- Due to growing environmental concerns, many chemical companies in China ceased activities in 2018; this led to an increase in manufacturing of specialty chemicals in the Indian market to ensure uninterrupted supply
- The Indian chemical industry is expected to further grow with a CAGR of 11-12% by 2027, increasing India's share in the global specialty chemicals market to 4% from 3%.
- As per a report of EY, the industry is currently estimated to be worth US\$ 220 billion, with growth of almost 9% per year between 2020 and 2025 to reach US\$ 300 billion by the fiscal year 2025. By FY 2040, the industry is predicted to reach US\$ 1 trillion in value.

Key growth drivers in the end-user industry for specialty chemicals include the following:

- **Paints & coatings:** Increase in urbanisation, increase in middle-income households, high replacement demand and increase in per capita income.
- **Textile:** Increase in Indian export, increase in urbanisation and higher disposal income.
- **Construction:** Low expenditure on admixtures compared with China and the US.
- **Home care:** Increased consumption.

Road Ahead

Despite the pandemic situation, the Indian chemical industry has numerous opportunities considering the supply chain disruption in China and the trade conflict between the US, Europe and China. Anti-pollution measures in China will also create opportunities for the Indian chemical industry in specific segments.

Additional support, in terms of fiscal incentives, such as tax breaks and special incentives through PCPIRs or SEZs to encourage downstream units will enhance production and development of the industry. The dedicated integrated manufacturing hubs under the Petroleum, Chemicals and Petrochemicals Investment Regions (PCPIR) policy to attract an investment of ₹ 20 lakh crore (US\$ 276.46 billion) by 2035.

To bring about structural changes in the working of the domestic chemical industry, future investments should not only focus on the transportation of fuels such as petrol and diesel but also on crude-to-chemicals complexes or refineries set up to cater to the production of chemicals.

OUR MANUFACTURING PROCESS

There are different stages that are involved in our manufacturing process, each stage is crucial and of utmost importance for the product to have its required quality and standard. We ensure quality control check at each of the manufacturing stages. Our manufacturing process consists of the following stage:

Manufacturing process steps

Step-1: Procurement of Raw Material

We intend to maintain sufficient level of inventory to meet our customer demands and requirements. To achieve this, we plan and forecast our productions and accordingly the order of raw material is placed. Our production team and sales team are in constant touch which helps us to order optimal level of raw material. Further, our technical team ensures that the raw materials we procure are meeting the quality standards. Once the raw materials are procured from local suppliers, it is stored in our manufacturing facility having adequate storage capacity.

Step-2: Material Inspection

All materials procured or manufactured at our site are properly tested for its purity and only after the approval of the purity, the same are used for further process.

Step-3: Ball Mill

This process involves grinding the raw CPC (Copper Phthalocyanine Crude) material for 24 hours in a cylindrical mill equipped with grinding media, such as steel or ceramic balls. During this time, the rotation of the mill causes repeated impact and attrition, breaking down the larger CPC particles into much finer particles.

Step-4: Pigmentation Vessel Reflux

The milled Copper Phthalocyanine Crude (CPC) is transferred into a pigmentation vessel along with other raw materials such as caustic soda, surfactants, and solvents. This mixture is then refluxed, or continuously boiled and condensed, for 24 hours. The reflux process ensures thorough mixing and reaction of the components, facilitating the formation of the pigment. After the refluxing period, the solvent is recovered and the resulting pigment mixture is prepared for the next stage i.e. Filter press.

Step-5: Filter Press

In this process, the pigmented mass from the pigmentation vessel is subjected to filtration. The mixture is passed through a filter press, which separates the solid pigment particles from the liquid components. During this process, the pigmented mass is thoroughly washed with water and air pressure to remove impurities and residual chemicals, ensuring that the material reaches a neutral pH. This washing and pressing process produces a concentrated pigment in the form of a press cake.

Step-6: Spin Flash Dryer

In the final production stage of Pigment Blue manufacturing, the press cake obtained from the filter press is processed through a spin flash dryer. This dryer is designed to efficiently and quickly dry the press cake into a fine, dry pigment powder suitable for commercial use.

Step-7: Final Inspection

The inspection team of the quality management department collects samples from all manufactured items by lot to compare with the standard samples through the Ultraviolet spectrophotometer, Desiccator, Hot plate, Hot air oven and automatic pigment muller, and thereby in case their colouring, penetration, fastness, etc. fall within the minimum allowable limits of error, the manufactured items shall be allowed to be packed as final products.

Step-8: Packaging

Once the product meets all the required quality criteria, it is packed into bags, jumbo bags, boxes, drums, etc., based on customer specifications. Packaging is meticulously carried out to ensure product safety and minimize environmental leakage. The dried pigment powder undergoes palletizing and shrink-wrapping before being readied for shipment, beginning with careful transfer onto pallets and organized stacking.

Step-9: Storage & Delivery

After proper packaging as per the customer's order, they are either directly loaded into trucks for shipment or they are stored in the warehouse inside the premises itself. Necessary care is taken to avoid any contamination of the product. Exports orders are made through, Jawaharlal Nehru Port (JNPT), Mumbai, Air Cargo Complex, Sahar, Andheri (East) as per the final location of the customers.

APPLICABLE LAWS AND REGULATIONS

BUSINESS/ TRADE RELATED LAWS/ REGULATIONS

Food Safety and Standards Act, 2006

The Food Safety and Standards Act, 2006 is a comprehensive legislation that consolidates various laws related to food safety and establishes the Food Safety and Standards Authority of India (FSSAI) to regulate the food industry. The Act aims to ensure the availability of safe and wholesome food for human consumption by laying down science-based standards for articles of food and regulating their manufacture, storage, distribution, sale, and import. Key provisions of the Act include establishing the FSSAI as the central authority for food safety and standards, defining food safety as the assurance that food is acceptable for human consumption according to its intended use, laying down standards and guidelines for articles of food, regulating the manufacture, storage, distribution, sale, and import of food articles, providing for the accreditation of certification bodies and laboratories, and the procedure for sampling and analysis of food, establishing the Food Safety Appellate Tribunal for adjudication of food safety cases, prohibiting and restricting the sale or approval of non-specified food and food ingredients that may cause harm to human health, and regulating food advertising and providing for licensing and registration of food businesses. The Act came into force on May 28, 2008, with different provisions being enforced on different dates, and has repealed several earlier laws, including the Prevention of Food Adulteration Act, 1954, consolidating the regulatory framework for food safety. The objectives of the Act include ensuring the availability of safe and wholesome food for human consumption, establishing a single reference point for all matters relating to food safety and standards, promoting general awareness about food safety and food standards, and providing scientific advice and technical support to the Central Government and State Governments on food safety and nutrition. The Act has marked a shift from a multi-level to a single line of control, focusing on self-compliance rather than a pure regulatory regime, leading to the establishment of a comprehensive regulatory framework for food safety and the development of standards for food products, safe food practices, and the training and capacity building of food businesses.

Prevention of Food Adulteration Act, 1954

The Prevention of Food Adulteration Act, 1954 is a significant legislation in India aimed at preventing the adulteration of food items to ensure the safety and quality of food consumed by the public. Enacted on September 29, 1954, this Act defines adulteration and outlines various scenarios where an article of food can be deemed adulterated. It covers instances where food sold does not meet the standards expected by the consumer, contains harmful substances, is processed under unhygienic conditions, or includes elements unfit for human consumption like diseased animal parts or poisonous ingredients. The Act extends to the entire country and has been pivotal in setting standards to combat food adulteration, ensuring that food products meet specified quality and purity criteria. The Act has evolved over time through amendments in 1964, 1976, and 1986, reflecting the ongoing efforts to enhance food safety regulations in India.

Drugs and Cosmetics Act, 1940

The Drugs and Cosmetics Act, 1940, which regulates the import, manufacture, distribution, and sale of drugs and cosmetics in India, is also applicable to the food color industry. This Act covers substances intended to affect the structure or any color of food products, ensuring that they meet specified standards and do not pose risks to human health. The Act prohibits the use of colors in food products that are not prescribed, harmful, or toxic, emphasizing the importance of maintaining quality and safety in the food color industry. Compliance with the provisions of this Act is essential for businesses involved in the manufacturing and distribution of food colors to ensure adherence to regulatory standards and the protection of consumer health.

Bureau of Indian Standards

The Bureau of Indian Standards (BIS) extends its applicability to the food color industry in India, where it plays a crucial role in ensuring quality and safety standards. BIS develops Indian Standards for various products, including food colors, making certification from BIS mandatory for certain food colors to be sold in the country. Manufacturers, both domestic and foreign, are required to obtain a BIS license to use the ISI mark on their food color products, with the certification process involving adherence to relevant Indian Standards, license application, and scrutiny through audits and sample testing by BIS before approval is granted. Selling food colors without the ISI mark is deemed illegal and can result in criminal charges, imprisonment, and fines, while imported food colors lacking a BIS license will face customs restrictions from July 1, 2023. This stringent certification framework ensures that food colors in the market meet specified quality and safety criteria, aligning with BIS's overarching objective of safeguarding consumer health and promoting product excellence in the food industry.

The Legal Metrology Act 2009

The Legal Metrology Act, 2009 ("LMA") provides for establishing uniform standards of weights and measures regulate trade in weights, and other goods which are sold or distributed by weight, measure or number. Every manufacturer, repairer and seller shall have to obtain a license from the respective 148 Controller. The Act allows Govt. approved test centers to verify weights and measures.

The Legal Metrology (Packaged Commodities) Rules, 2011

The Legal Metrology (Packaged Commodities) Rules, 2011 regulate the pre-packaging and sale of commodities in packaged form in India, requiring every package to bear declarations such as the name and address of the manufacturer/packer, the common name of the commodity, the net quantity, the month and year of manufacture/packing, and the retail sale price, while specifying standard package sizes for certain commodities and providing exemptions for specific products; the rules empower legal metrology officers to enforce the provisions and take action against non-compliance, with the requirements of the Prevention of Food Adulteration Act, 1954 taking precedence for packaged food items, in order to standardize the labeling and packaging information provided to consumers for commodities sold in pre-packaged form across India.

The Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH)

The Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH) Regulation is a European Union regulation that addresses the production and use of chemical substances and their potential impacts on human health and the environment. The main goals of REACH are to improve the protection of human health and the environment from the risks posed by chemicals, while enhancing the competitiveness of the EU chemicals industry. Key aspects of REACH include registration, where companies must register chemical substances manufactured or imported into the EU in quantities exceeding 1 metric ton per year, and registrations are submitted to the European Chemicals Agency (ECHA) through the IUCLID website. Evaluation involves ECHA evaluating individual registrations for compliance, and EU Member States evaluating selected substances to clarify initial concerns for human health or the environment. Authorization allows substances of very high concern to be subject to authorization to ensure risks are adequately controlled or justified by socio-economic grounds, and by March 2019, authorizations had been granted 185 times, with no eligible request ever having been rejected. Restriction enables authorities to restrict the use of hazardous substances if their risks are unmanageable, and restrictions can be introduced across the European Community where shown to be necessary. REACH places the burden of proof on companies to identify and manage risks linked to the substances they manufacture and market in the EU, and it impacts a wide range of companies across many sectors, even those not directly involved with chemicals.

ENVIRONMENTAL LAWS

The Environment (Protection) Act, 1986 ("EPA"), Environment Protection Rules, 1986 (the "EP Rules") and the Environmental Impact Assessment Notification, 2006 ("EIA Notification")

The EPA has been enacted for the protection and improvement of the environment. EPA empowers the government to take all measures to protect and improve the quality of environment, such as by laying down standards for emission and discharge of pollutants, providing for restrictions regarding areas where industries may operate and laying down safeguards for handling hazardous substances, amongst others. It is in the form of an umbrella legislation designed to provide a framework for Central Government to coordinate the activities of various central and state authorities established under previous laws. It is also in the form of an enabling law, which delegates wide powers to the executive to enable bureaucrats to frame necessary rules and regulations. Further, the EP Rules specifies, inter alia, the standards for emission or discharge of environmental pollutants, prohibitions and restrictions on the location of industries as well as on the handling of hazardous substances in different areas. For contravention of any of the provisions of the EPA or the rules framed thereunder, the punishment includes either imprisonment or fine or both. Additionally, under the EIA Notification and its subsequent amendments, projects are required to mandatorily obtain environmental clearance from the concerned authorities depending on the potential impact on human health and resources.

The Water (Prevention and Control of Pollution) Act, 1974 (“Water Act”)

The Water Pollution Act aims to prevent and control water pollution. This legislation provides for the constitution of a central pollution control board and state pollution control boards. The functions of the central board include Coordination of activities of the state boards, collecting data relating to water pollution and measures for the prevention and control of water pollution and prescription of standards for streams or wells. The state pollution control boards are responsible for planning for programmes for prevention and control of pollution of streams and wells, collecting and disseminating information relating to water pollution and its prevention and control; inspection of sewage or trade effluents, works and plants for their treatment and reviewing of the specifications and data relating to plants set up for treatment and purification of water; laying down or annulling the effluent standards for trade effluents and for the quality of the receiving waters; and laying down standards for treatment of trade effluents to be discharged. If the required standards and conditions are not complied with, the relevant SPCB may serve a notice on the concerned person and cause the local magistrate to pass an injunction to restrain the activities of such person and impose fines.

The Water Pollution Act prohibits any person from establishing any industry, operation or process or any treatment and disposal system, which is likely to discharge trade effluent into a stream, well or sewer without taking prior consent of the state pollution control board. Under section 25 of the Water Pollution Act, the state board may give its consent for the establishment of the industry subject to conditions that it may impose and for a duration that it may specify. Having given consent, it can review its consent or the conditions imposed and revoke or alter any of them. Subject to the other provisions of the legislation, the state board may issue directions for the closure, prohibition or regulation of any industry.

The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of the National Environmental Policy:

- Conservation of Critical Environmental Resources
- Intra-generational Equity: Livelihood Security for the Poor
- Integration of Environmental Concerns in Economic and Social Development

SUMMARY STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES & NOTES TO RESTATED FINANCIAL INFORMATION

COMPANY OVERVIEW

Unilex Colours And Chemicals Limited was, incorporated on 23rd March, 2001 and is engaged in the business of manufacturing and dealing in Dyes & Pigments and Food Colours.

I. SIGNIFICANT ACCOUNTING POLICIES

A. Basis of preparation of Restated Financial Statements:

The Restated Statement of Assets and Liabilities as at March 31, 2024, March 31, 2023 and March 31, 2022 the Restated Statements of Profit and Loss, the Restated Cash Flow Statement for the year ended March 31, 2024, March 31, 2023 and March 31, 2022 the Summary Statement of Significant Accounting Policies, the Notes and Annexures as forming part of these Restated Financial Statements (collectively, the “Restated Financial Information”), as approved by the Board of Directors of the company.

These financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 (‘the Act’) read with Rule 7 of the Companies (Accounts) Rules, 2014, the provisions of the Act. The accounting policies adopted in the preparation of financial statements have been consistently applied. All assets and liabilities have been classified as current or non-current as per the company’s normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of operations and time difference between the provision of services and realization of cash and cash equivalents, the company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

B. Use of Estimates

The preparation of financial statements is in conformity with Indian GAAP requires judgments, estimates and assumptions to be made that affect the reported amount of assets and liabilities, disclosure of contingent liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognized in the period in which the results are known / materialized.

C. ACCOUNTING CONVENTION

The Company follows the mercantile system of accounting, recognizing income and expenditure on accrual basis. The accounts are prepared on historical cost basis and as a going concern. Accounting policies not referred to specifically otherwise, are consistent with the generally accepted accounting principles.

The following significant accounting policies are adopted in the preparation and presentation of these financial statements:

1. Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

Sales of goods are recognized on transfer of significant risks and rewards of ownership to the buyer, which generally coincides with the delivery of goods to customers.

Interest income is accrued on a time proportion basis, by reference to the principle outstanding and the effective interest rate applicable.

2. Property, Plant and Equipment

- a) Property, Plant and Equipment are stated as per Cost Model i.e., at cost less accumulated depreciation and impairment, if any;
- b) Costs directly attributable to acquisition are capitalized until the Property, Plant and Equipment are ready for use, as intended by the management;
- c) Subsequent expenditures relating to Property, Plant and Equipment are capitalized only when it is probable that future economic benefits associated with these will flow to the Company and the cost of the item can be measured reliably. Repairs & maintenance costs are recognized in the Statement of profit & Loss when incurred;

- d) The cost and related accumulated depreciated are eliminated from the financial statements upon sale or retirement of the asset and the resultant gains or losses are recognized in the Statement of Profit or Loss. Assets to be disposed of are reported at the lower of the carrying value or the fair value less cost to sell;
- e) Depreciation on fixed assets will be calculated using the Straight-Line Method (SLM) method, which involves applying depreciation rates prescribed under Schedule II to the Companies Act 2013. to the carrying amount of the asset. The carrying amount is reduced each year by the amount of depreciation charged.
- f) Depreciation methods, useful lives, and residual values are reviewed periodically, including at each financial year end;

3. Impairment

The Management periodically assesses, using external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

4. Inventories

Inventories are valued after providing for obsolescence, as follows:

Raw Materials -Lower of cost and net realizable value. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Cost is determined on First in First out basis.

5. Retirement Benefits & Other Employee Benefits

Defined-contribution plans:

All short-term employee benefits are accounted on undiscounted basis during the accounting period based on services rendered by employees.

The Company's contribution to Provident Fund is determined based on a fixed percentage of the eligible employees' salary and charged to the Statement of Profit and Loss on accrual basis.

The Group has made provision for payment of Gratuity to its employees. This Provision is made as per the method prescribed under the Payment of Gratuity Act. The cost of providing gratuity under this plan is determined on the basis of actuarial valuation at year end.

6. Foreign Exchange Transactions

Foreign-currency denominated monetary assets and liabilities if any are translated at exchange rates in effect at the Balance Sheet date. The gains or losses resulting from the transactions relating to purchase of current assets like Raw Material or other products are included in the Statement of Profit and Loss. Revenue, expense and cash-flow items denominated in foreign currencies are translated using the exchange rate in effect on the date of the transaction.

7. Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non- cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities are segregated.

8. Borrowing Costs

Borrowing costs that are directly attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of that asset till such time the asset is ready for its intended use. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use. Costs incurred in raising funds are amortized equally over the period for which the funds are acquired. All other borrowing costs are charged to profit and loss account.

9. Income Tax

The accounting treatment for the Income Tax in respect of the Company's income is based on the Accounting Standard on 'Accounting for Taxes on Income' (AS-22). The provision made for Income Tax in Accounts comprises both, the current tax and deferred tax. Provision for Current Tax is made on the assessable Income Tax rate applicable to the relevant assessment year after considering various deductions available under the Income Tax Act, 1961.

Deferred tax is recognized for all timing differences; being the differences between the taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Such deferred tax is quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date. The carrying amount of deferred tax asset/liability is reviewed at each Balance Sheet date and consequential adjustments are carried out.

10. Earnings Per Share

Basic earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

11. Provisions And Contingent Liabilities

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the likely future outflow of economic benefits required to settle the obligation at the reporting date. Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

12. Cash & Cash Equivalents

Cash and cash equivalents comprise cash and cash on deposit with banks. The Company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.

13. Segment Reporting

The Company is having revenue; from its customers which are located outside India; of more than 10% of its total revenue.

Accordingly, as per AS-17 Segment Reporting, the company has identified geographic segment as its reportable segment.

The company has maintained records for cost of material consumed and other expenses incurred for manufacturing of goods in accounting system for all the products. Phased implementation of UPI

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of, inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by UPI Bidders through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. The SEBI in its circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023, has reduced the time period for listing of equity shares pursuant to a public issue from six Working Days to three Working Days. The timeline was applicable on a voluntary basis for public issues opening on or after September 1, 2023 and has been made applicable on a mandatory basis for public issues opening on or after December 1, 2023. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase became applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever was later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Subsequently, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II until further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds was discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continued to be six Working Days during this phase.

SEBI through its circular SEBI/HO/CFD/DIL2/CIR/P/2022/45 dated April 5, 2022, prescribed that all individual bidders applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to ₹500,000, shall use UPI. Individual investors bidding under the Non-Institutional Portion bidding for more than ₹200,000 and up to ₹500,000, using the UPI Mechanism, shall provide their UPI ID in the Bid cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“**T+3 Notification**”). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The processing fees for applications made by UPI Bidders may be released to the SCSBs only after such banks provide a written confirmation, in compliance with the SEBI RTA Master Circular in a format as prescribed by SEBI, from time to time, and such payment of processing fees to the SCSBs shall be made in compliance with circulars prescribed by SEBI and applicable law.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI. Our Company will be required to appoint one of the SCSBs as the Sponsor Bank(s) to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Bidders.

SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021, SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 and SEBI circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“**UPI Streamlining Circular**”), SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Streamlining Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank

accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Further, in terms of the UPI Circulars, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the BRLM, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.

The processing fees for applications made by UPI Bidders may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 NPCI vide circular reference no. NPCI/UPI/OC No. 127/ 2021-22 dated December 09, 2021, inter alia, has enhanced the per transaction limit in UPI from more than ₹200,000 to ₹500,000 for UPI based ASBA in initial public offerings.

If the Issue is made under UPI Phase III of the UPI Circular, the same will be advertised in all editions of the English national newspaper Business Standard, all editions of Hindi national newspaper Business Standard and Marathi Edition of Regional newspaper Pratahkal where the registered office of the company is situated, each with wide circulation and such advertisement shall also be made available to the Stock Exchanges for the purpose of uploading on their websites.

Our Company will be required to appoint Sponsor Banks to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/or payment instructions of the UPI Bidders using the UPI.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the “FDI Policy”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company. Investors will not offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.

Any equity holding by a person resident outside India resulting from conversion of any debt instrument under any arrangement shall be reckoned as foreign investment under the composite cap.
